

PTC Kitting and Logistics Customized Solutions

PTC RAPID WAYSIDE DEPLOYMENT SOLUTION

Alstom's PTC deployment support takes advantage of extensive global resources and Alstom developed system tools to offer full supply chain and logistics management, as well as kitting third-party products into immediately available and site-ready PTC solutions available from warehouses across the country.

- > Complete supply chain management services
- > Kitting, packaging and off the shelf delivery
- > Installation and technical support services

BENEFITS

- > Assistance with PTC wayside installation
- > Support of your RR's PTC material sourcing strategy
- > On-time delivery of the complete set of required materials
- > Management of short and long term costs of PTC wayside deployment
- > No need to issue multiple purchase orders
- > Customized configuration
- > Integration of sub-kits for applications requiring WIU and radio only
- > Ease of installation
- > Reusable packaging creating a "green" deployment solution

PTC IN A BOX APPROACH

For your convenience, Alstom offers a PTC-in-a-Box Solution that enables integration of the necessary materials for a smooth PTC deployment.

The PTC-in-a-Box solution is a convenient and reusable package that can include Alstom's microWIU or 3rd party products as required and determined by your Railroad.

In addition, the PTC-in-a-Box will include all the ancillary equipment needed to allow for a quick and efficient field installation.

Alstom's PTC-in-a-Box approach can be custom designed to suit the needs and requirements of your Railroad.

To offer PTC deployment solutions Alstom will draw experience and expertise from Alstom's Train Life Services (TLS) business unit.

TLS is headquartered in Naperville, IL, providing equipment, repair, replacement, diagnostics capabilities and the ability to warehouse and manage customers' spare equipment.

Alstom TLS also has world class service facilities in New Castle, DE and Mare Island, CA.
